Homework 2: GitHub

Due February 7, 2024 at 11:59PM

Make a new repo for this class[1] (this step is not necessary if you have already made one). You can organize it however you like, but I would recommend having a designated folder for homeworks, and a folder for discussions[2]. ssh into this repo, and then cd out of it (we will come back to it later).

Then, you will ssh into my repo: git@github.com:cgtolley/homework2.git[3]. You will either move or make a copy of the file labeled 'questions.txt' into your homework folder in your repo that you created in the first step. Rename it something with your name in it, like 'questions_[name].txt'.

You will cd back into that repo, and commit it to your GitHub. Now, you can submit your GitHub repo through GradeScope.

That will get you 25/50 pts, but if you can prove to me that you edited the text file, created the file with your name on it, and pulled and merged everything on your command line, then you get the other 25 points. The best way to do this is to take screenshots of every step, move it into your homework repo, and commit it alongside the .txt file.

---

[1]If you forget how, you can reference the slides from the 1/24 lecture or Google.
[2]You can always go back and change things, it will just require some work.
[3]If you don't remember how, there is a step-by-step in bCourses.
